Gypsy,

Having refreshed my knowledge of Article 2 of the Geneva Convention and taking into account the actions of the un-elected government of 1975 in regards to the bloodless coup de tat undertaken in Canberra on November 11, I am more aware of my role as an armed occupier of these lands. My position as an agent of the Crown is juxtaposed with my role as an armed occupier. Clearly under the Geneva Convention I am at war with my own Government, the Crown and myself. I patiently await the arrival of agents from a foreign land as they arrive to extradite me to an International Court, possibly in the Hague, where I may be held accountable for my actions.

In the meantime I will assume the status of 'hors de combat'. As such I can no longer engage in this futile battle with you, as entertaining as it has been, and I too invoke my rights as recognised by the Lieber Code of 1863 and Article 2 of the Geneva Convention of 1949 and it's protocols...

You are now barred from contacting me in any format.

Regards,

David (hors de combat)
